

# THE WINDS OF CHANGE IN COMPUTER SCIENCE

APRIL 8-10, 2010 JACKSON STATE UNIVERSITY, JACKSON, MS

THE SYMPOSIUM ON COMPUTING AT MINORITY INSTITUTIONS

## ADMI 2010 Conference Support Application

Understanding the relationship between sea level rise and melting ice sheets is an issue of global importance. The NSF Science and Technology Center for the Remote Sensing of Ice Sheets (CReSIS <http://cresis.ku.edu>) is the only NSF Science and Technology Center dedicated to developing techniques and technologies for determining the contribution of ice sheets to sea level rise. The POLAR GRID project provides the cyberinfrastructure and data processing capability that CReSIS scientist need. We invite you to join us at the ADMI Conference at Jackson State University, Jackson, Mississippi.

The awards will be distributed during the Awards dinner on Saturday to acknowledge your potential as a POLAR GRID CI-TEAM scholar. Visit the website <http://www.admiusa.org> for information of how to submit a poster or paper. The paper can cover your past academic year or summer internship research activities. You must attend the ADMI conference and sign in at the POLAR GRID booth in the exhibit hall. Fax this completed application and stipend form to Dr. Linda Hayden (252) 335-3790.

Name \_\_\_\_\_ Citizenship \_\_\_\_\_
