### ADMI 2012 Conference Support Application

Understanding the relationship between sea level rise and melting ice sheets is an issue of global importance. The NSF Science and Technology Center for the Remote Sensing of Ice Sheets (CReSIS <http://crexis.ku.edu>) is the only NSF Science and Technology Center dedicated to developing techniques and technologies for determining the contribution of ice sheets to sea level rise. CReSIS invites you to join us at the ADMI Conference April 12-14, 2012 at Howard University.

If approved, your award will be distributed during the lunch on Friday to acknowledge your potential as a POLAR scholar. Awardees must present a research poster or oral presentation.
